Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows: Paragraph 1 of the specification is amended to read:

"CROSS.REFERENCE TO RELATED APPLICATIONS

This application is a divisional application of and claims priority from earlier filed US Patent Application No. 10/015,362, filed December 12, 2001, now issued as US Patent No. 6,654,188, the contents of which are incorporated herein by reference."

Examiner's Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims 1-18 describe a thermooptically active composition comprising 10 to 90% by weight of a polymer fluid and 90 to 10% by weight of a wax having a low melting point, where the wax is at least partially solidified and composition is at least partially opaque in an OFF state at a first temperature and the wax is at least partially fluidized and the composition is at least partially transparent in an ON state at a second, higher temperature.

Art Unit: 2874

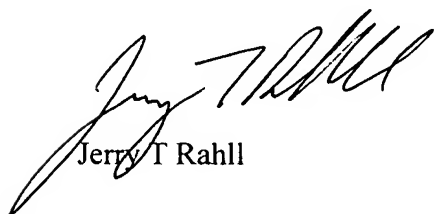

5. "Synthetic Grease" by Rudnick et al. describes a composition comprising a polymer fluid and a wax having a low melting point (as discussed in the Office Action mailed 4 May 2005). Rudnick et al. does not describe the composition as thermooptically active or having differing levels of opaqueness at different temperatures.
6. "Synthetic Grease" by Rudnick et al. remains the closest prior art of record in this application. For the reasons stated above, however, Claims 1-18 herein are deemed to patentably distinguish over and all other prior art of record.
